Our first solo exhibit with Megan Euell, shows how one painter can travel to different parts of the globe and bring us, as a collective, to be solidly grounded in our current space, place and time; simultaneously feeling the connections and echoes of life that have brought us here.

The Italian phrase Pitture della Vita honors both the medium and action (painting), that allows us the remembrance of the lasting effects of the beauty that surrounds us.

The landscapes that color the show - Southampton, Savannah, Florence and Tuscany - visually narrate the painter's path and chosen life as an artist.

On view from August 6th to September 4th
